PROFESSIONAL EXPERIENCE

eBusiness Solutions Associate *(Promotion)*

October 2022 to Current

Komatsu | Milwaukee, WI | Smart Construction & E-Commerce

- Performed SQL database work including monitoring, automation, and stored procedure creation to ensure optimal performance.
- Develop React container app features, expanding frontend capabilities alongside backend services.
- Promptly addressed database-related customer service issues and optimized processes to improve the customer experience.
- Managed Azure Cloud infrastructure for applications, including monitoring and optimization.
- Built and maintained the Azure DevOps environment to streamline workflows and increase operational efficiency.
- Use UiPath, SQL, and Power Automate to automate monitoring, implementing a Status Page that improved app reliability by ~50%.
- Conducted DevOps quality assurance using SonarQube.
- Used GitHub and Azure DevOps for version control and CI/CD pipelines.
- Operated with APIs and servers for the main application, MyKomatsu.
- Introduced and implemented AI tools such as Copilot and OpenAI to enhance development processes.
- Assisted in user sign-in and sign-on processes through Microsoft Entra.
- Collaborate with dynamic, cross-functional teams responsible for managing and maintaining enterprise applications.
- Stayed up to date on industry trends and information to ensure current processes remain competitive and innovative.

ASK Ticket Specialist L2

July 2022 to October 2022

Komatsu | Milwaukee, WI | Smart Construction & E-Commerce

- Designed and implemented SQL database monitoring and automation, improving system efficiency and reliability.
- Successfully managed customer service requests related to User issues, Database errors, and Telemetry troubleshooting; ensured appropriate follow-up to contribute to a positive customer experience.
- Managed and optimized Azure Cloud infrastructure, including building and maintaining a scalable Azure DevOps environment.
- Developed custom application monitoring solutions, including a Status Page and UiPath automation, to streamline performance tracking.
- Enhanced development processes by integrating AI tools such as Copilot and OpenAI into daily workflows.

Digital Media Specialist

March 2021 to July 2022

One Touch Point | Hartland, WI | Web & Graphic Design

- Collaborated with team members to develop and maintain unique applications.
- Accurately followed customization requests while adding brand personality to optimize attractiveness.
- Discover each client's vision through effective communication and high engagement to incorporate into advanced design.
- Manage and contact various clients verbally and through email to set meetings and confirm plans.
- Utilized Adobe Offices to create intricate website layout for clients.
- Validated software through Linux.

EDUCATION & AFFILIATIONS

Bachelor of Science – Computer Science

The University of Wisconsin – Whitewater | Whitewater, WI | May 2021

Volunteering

American Foundation for Suicide Prevention: Volunteer for events to raise awareness and donations.

Crossway Church: Volunteer for events at local church.
